

The **BRAVURA**, from the Italian, meaning *'great technical skill and brilliance shown in a performance'*, is Warwick Acoustics latest electrostatic headphone to be produced, following on from the multi-award-winning SONOMA M1 and APERIO range of premium Headphone Systems.

It is designed to reproduce audio content as pristinely and accurately as possible, revealing the details and complexities of an original recording without colouration or alteration. Simply put, it delivers remarkable listening experiences never imaginable.

The **BRAVURA** is designed to work with the multi-award winning Sonoma M1 Amplifier with RCA Analog inputs and USB and Coax S/PDIF digital inputs.

Configuration	Open-back headphones; circumaural type
Transducer	HPEL, single-ended electrostatic
Effective Diaphragm Area	3570mm ²
Moving Mass (for dynamic range)	< 0.2g
Transducer Capacitance	105pF
Transducer Impedance	> 5GΩ
THD	0.1% @ 1kHz / 100dB SPL
Frequency Response	10Hz - 60kHz
Bias Voltage	1350Vdc
Cable	Ultra-low capacitance, High-precision cable, 2m length
Weight (without cable)	403g (14.2oz)
